Wayne,

Thanks for the welcome back! I'll confirm the following – but here's what I recall:

-The sample aliquots are not able to be reanalyzed due to the analytical processing (just to clarify they were not intentionally destroyed). There is the opportunity to take additional aliquots from the larger sample volume which is retained.

-The samples were analyzed for Pu-239. I'll track down the status/results of that for next Tuesday's call.

Thanks!

V/r,
Paul

Paul –

Welcome back. In our next Tuesday call I would also like to follow up on the discussion we had on 5/25:

- Did the Navy confirm that the sample extracts from the two samples exceeding the Sr-90 RG were destroyed and are not available to be recounted? (samples HPPG-ESU-TU079A-001 and HPPG-ESU-TU124A-021)
-
- Were the samples analyzed for Pu-239? The Parcel G workplan says "If the laboratory results indicate the presence of concentrations of 90Sr at or above the respective RG (Worksheet #15c), the sample will be analyzed by alpha spectroscopy for 239Pu (Worksheet #15b)."

Thanks.

Terry,

I've been on leave the last couple of weeks and haven't had a chance to review. Liz is on leave, returning next Tuesday, so let's plan to have a discussion on our Tuesday meeting once I've had a chance to take a look.

Thanks for checking in!

V/r,
Paul

Hi Liz and Paul,

I am wondering if Navy has any questions regarding our comments on the Parcel G Building 809 RBA. Thank you very much!

Best,

Terry

EXTERNAL:

Hi Nina,

Attached please find the finalized comments we have on Navy's RTC on HPNS Parcel G Building 809 RBA. Please let me know if you have any question.

Please also let me know if you prefer me sending the file directly to Liz or you will forward our comments to Navy.

Thank you very much,

Terry
